JETMASTER MK6 SERIES

88 - 668 TON TOGGLE - Injection moulding machine

JETMASTER MK6 SERIES 88 – 668 TON TOGGLE Injection moulding machine

EUROMAP STANDARD

Hole pattern and ejector pattern according to Euromap standards*.
T-slot or other pattern possible on request.

SUPER HIGH PRECISION

Exclusive for this MK6 range is the new proprietary servo pressure regulation technology. This unique technology ensures fast pressure relief while never reversing the pump. High precision linear transducers are used for the clamping, injection and ejector axes. All results in low-pressure mould protection.

EUROPEAN COMPONENTS

Standard European components:

Hydraulic valves: Bosch Rexroth

Hydraulic pump: Eckerle

Linear transducers: Gefran or Novotechnik

Electrical components: Siemens, Schneider, Telemecanique, PILZ

*Hole pattern/ejector pattern may differ from standard due to platen design.

PPC2200 CONTROLLER APPLICATION

The PPC2200 controller from B&R offers an integrated solution for the automation of the Chen Hsong injection moulding machines. High-speed applications and complete production cells can be implemented with B&R. The integrated Extremely Fast Control technology enables the sampling of rapidly changing input signals, allowing the injection process to be controlled with high precision. The 15.6" screen area with touch function enables a clear process visualization.

HIGH PERFORMANCE AND VERSATILE SCREW DESIGN

More than 20 years of Japanese expertise is used for the development of the screws for this MK6 series. They are available for several process requirements (i.e. PVC screw, PC barrier screw) and for high demand mixing requirements (high mixing barrier screw).

HIGH SPEED, SHORT CYCLE TIME

The Chen Hsong MK6 series has the fastest clamping, injection and ejection movements among competition. This results in increased production efficiency with smoother and more stable movements.

INOVANCE SERVO DRIVE SYSTEM

The Inovance servo drive system is designed dedicated for injection moulding machines. This system provides high performance, precision, low noise and easy maintenance. For machines using this servo drive, energy saving up to 80% can be achieved

ENERGY SAVING

The Chen Hsong machines are equipped with speed controlled servomotors. The system pressure is measured real-time by a pressure sensor. In this way, it can provide the flow according to requirement and non-functioning consumption is eliminated. This leads to lower energy consumption, high precision, low noise and low inertia.

STANDARD AND OPTIONAL FEATURES

CLAMPING UNIT	STANDARD	OPTION
Automatic mould height adjust	•	
Hydraulic safety device	•	
Core puller on moving platen	2	
Additional core pullers (up to 6 core pullers)		•
Airblow on fixed and moving platen	1 + 1	
Parallel core movement		•
Parallel ejector movement		•
Euromap 2 platen design *	•	
Euromap 13 for core and ejector	•	
Euromap 18 for robot mounting	•	
Euromap 67 for robot communication	•	
Euromap 70 and 70.1		•
Larger maximum mould height		•
Automatic toggle lubrication	•	
Automatic lubrication on mould height adjust		•
Anti-skid plates on horizontal surfaces	•	
Differential boost for high-speed clamping	•	
Safety door with hydraulic and electrical safety interlock protection	•	
High tensile chrome-plated tie bars	•	
Oil-less bushings for toggle system		•
Ejection-on-fly / core-pull-on-fly		•
OTHERS		
Up to 16 zones integrated hotrunner System (Euromap 14 standard)		•
Power sockets 3-phase 400V 32A and 16A	One each	
Power sockets 2-phase 240V 16A	2	
Waterflow regulators (more available upon request)	6 circuits	

*Hole pattern/ejector pattern may differ from standard due to platen design.

INJECTION UNIT	STANDARD	OPTION
Ceramic heater bands	•	
Nitrated screw and barrel	•	
Bi-metallic screw and barrel		•
PET or PVC screw features		•
PVC and UPVC-specialized injection units		•
Back pressure control	•	
Barrel shut-off nozzle		•
Hydraulic/pneumatic sequential injection(up to12 valves)		•
Linear transducer on injection stroke	•	
Linear transducer on injection unit stroke	•	
Screw speed indicator	•	
Controlled feeding zone cooling	•	
Automatic PID temperature control	•	
Barrel isolation		•
Central lubrication points	•	
Anti-skid plates on horizontal surfaces	•	
Parallel plasticizing		•
Broken thermocouple detection alarm	•	
Blocked nozzle and overflow detection	•	
(Locking type) screw tip set	•	
CONTROLLER		
Beckhoff PPC2200 controller	•	
15.6" HD TFT display with touch function	•	
LED backlight	•	
Free programmable cores	•	
Free I/O Configuration	•	
Sequence editor	•	
High-precision mould safety	•	
PowerLink -based Extremely Fast Control technology	•	
Ethernet interface for teleservice via internet	•	
USB interface	•	
Euromap 67 interface	•	
Industry 4.0		•
OPC-UA		•
